Cashier Frame

A cashier frame is a workstation where cashiers take orders from customers

Payment Frame

Payment frame is a system that aims to ensure the security and accuracy of customer payments while providing the necessary information for confirmation and transaction processing.

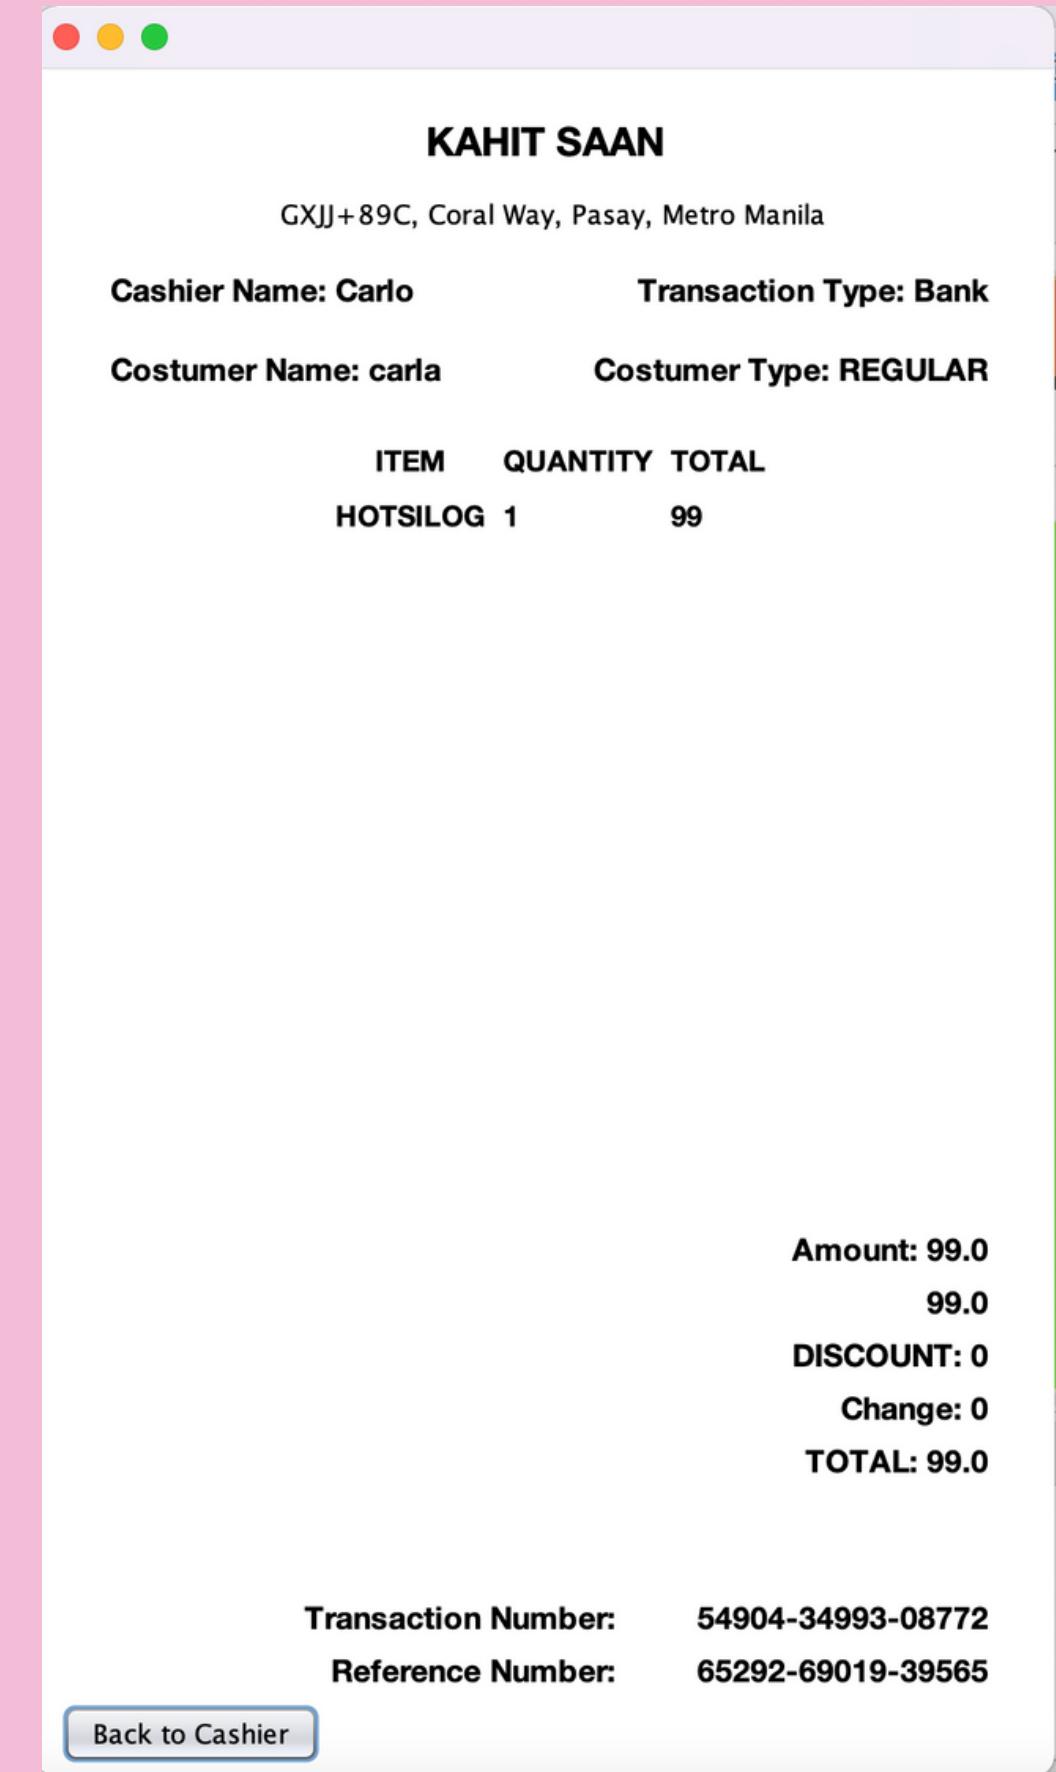

A screenshot of a payment frame application window. The window has a black border and an orange background. At the top right, it displays "TOTAL: 99.0". Inside the window, there are several input fields and buttons:

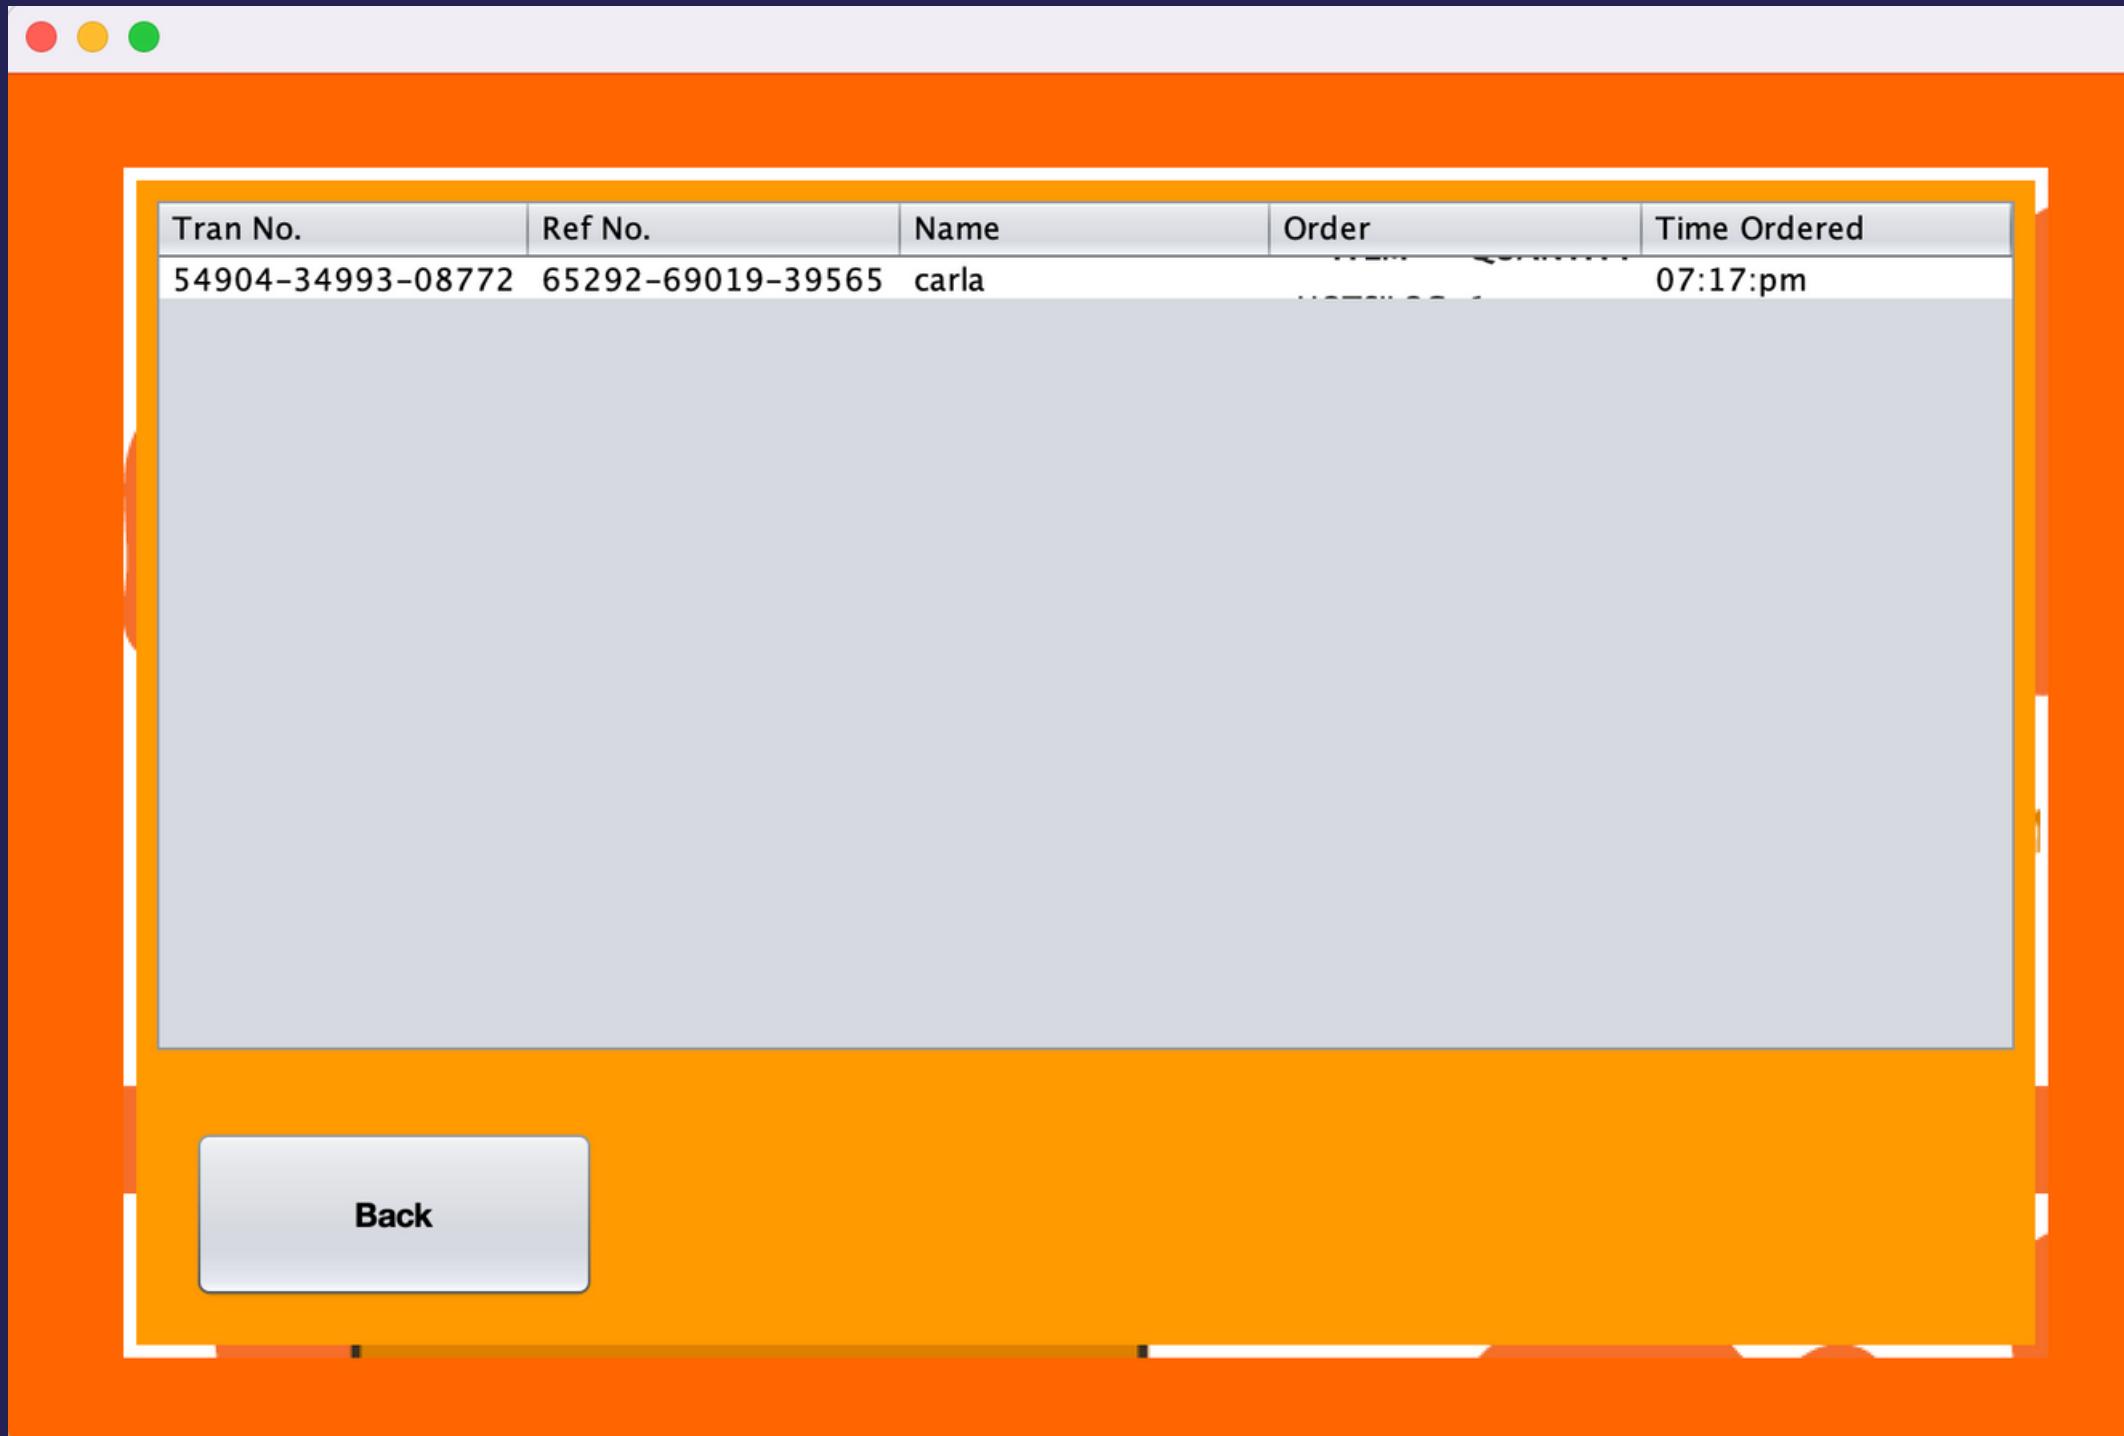

- "Customer Name": A text input field containing "carla".
- "Customer Type": A dropdown menu showing "Regular".
- "Payment Mode": A dropdown menu showing "Bank". To its right is a "Receive" button.
- "Amount": A text input field containing "100". To its right is a "PAY" button.
- Below the amount input are four buttons: "100", "200", "500", and "1000".
- "Change": A label followed by an empty text input field.
- "Discount": A label followed by an empty text input field.
- At the bottom left is a "Back" button, and at the bottom right is a "Get Receipt" button.

Receipt Frame

Receipts serve as records for both the customer and the seller. Customers can keep receipts for their personal records, expense tracking, or potential returns or exchanges.

Order History

Order history is frame that record or log of past purchases or transactions made by a customer, providing a chronological overview of their buying activity with relevant details
